Product Description

Product Description:

One of the key features of this product is its adjustable brightness, allowing users to customize the brightness level to their personal preference. This is especially helpful for users who spend long hours working on their computer or playing games, as it can reduce eye strain and improve overall comfort.

Another impressive feature of this product is its speedy response time of just 5ms. This ensures that users experience minimal lag or delay when using the touch screen, making it ideal for gaming, design work, or any other task that requires quick and accurate touch response.

The Gaming PCAP Touch Screen Side+Edge LED Bezel also boasts projected capacitive touch technology, which allows for highly accurate and responsive touch input. This feature is particularly useful for professionals who need to work with intricate designs or graphics, as it allows for precise control and manipulation of the on-screen elements.

For added convenience, this product comes with two mounting options - VESA mount or panel mount. This means users can choose the mounting option that best suits their needs and preferences, whether that be mounting the screen on a wall or attaching it to a stand.

In summary, the Gaming PCAP Touch Screen Side+Edge LED Bezel is an impressive and versatile product that is perfect for both gaming and professional use. With its Full HD touchscreen monitor, custom capacitive touch screen, and industrial touch screen PC, users can enjoy a seamless and intuitive touch experience with minimal lag or delay. Plus, with its adjustable brightness and multiple mounting options, this product is designed to provide maximum comfort and convenience for users.

Features:

Product Name: Gaming PCAP Touch Screen Side+Edge LED Bezel

Type: Capacitive Touch Screen

Mounting Options: VESA Mount Or Panel Mount

Touch Technology: Projected Capacitive

Durability: Scratch-resistant

Size: 32"
