Gaming Ambient Light

Perfect for Game Touch Screen

Applications:

This product is also equipped with a 1000:1 contrast ratio, which delivers vivid and sharp colors, making your gaming experience more immersive. Moreover, the operating temperature range of this product is between 0°C~40°C, making it suitable for use even in warm environments.

The Gaming Infrared Touch Screen Side+Edge LED Bezel product is perfect for gamers who want to take their gaming experience to the next level. The product is designed with Illumination Gaming Headsets and Gaming Ambient Light that create an immersive environment. The LED bezel on the side and edge of the product adds an extra touch of style to your gaming setup.

You can use this product in various occasions and scenarios. If you are a professional gamer, you can use it to play competitive games on a larger screen. If you love playing games with your friends, you can use it to host gaming parties at your home. Additionally, you can also use it in gaming cafes and other similar establishments.

The Gaming Infrared Touch Screen Side+Edge LED Bezel product is perfect for all types of games, whether you are playing first-person shooters, racing games, or sports games. The infrared touch technology ensures that the product is responsive and accurate, allowing you to take your gaming skills to the next level.

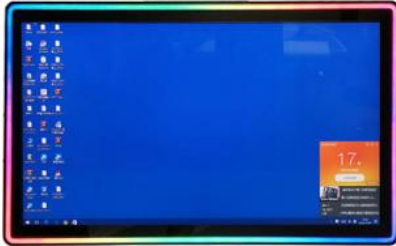

Customization:

The Gaming Infrared Touch Screen side+edge LED Bezel product features an infrared touch screen technology, making it a perfect Game Touch Screen. With a brightness of 500 Cd/m² and a viewing angle of 178°, it provides an immersive gaming experience. The product operates at a temperature range of 0°C~40°C, ensuring that it can be used for long hours without overheating.

Our team of experts can help you customize this product to fit your specific requirements. Whether it is changing the size, adding features, or modifying the design, we can do it all. Contact us today to learn more about our product customization services for the Infrared Touch Monitor.
