Product Description

Product Description:

The Infrared Touch Screen technology is perfect for gamers who want to have an immersive gaming experience. This technology allows for a more natural and accurate touch response, making it easier for gamers to play their favorite games. The touch technology used in this monitor is infrared, which is known for its accuracy and responsiveness.

The Gaming Infrared Touch Screen Side+Edge LED Bezel has an operating temperature range of 0°C~40°C, making it suitable for use in a variety of environments. Whether you're playing games in a warm or cool room, this monitor will work perfectly.

The contrast ratio of this monitor is 1000:1, which ensures that the colors on the screen are bright and vivid. This is especially important for gamers who want to see every detail of their games. With this contrast ratio, you can be sure that you'll be able to see everything that's happening on the screen.

If you're looking for a Gaming LED Monitor that will provide you with an immersive gaming experience, then the Gaming Infrared Touch Screen Side+Edge LED Bezel is the perfect choice. With its advanced touch technology and high contrast ratio, this monitor will allow you to enjoy your favorite games like never before.
