Product Description

Product Description:

The monitor features projected capacitive touch technology, which is one of the most advanced touch screen technologies available. This technology allows for multi-touch gestures, such as pinch-to-zoom and swipe, making it ideal for gaming and other interactive applications.

The side and edge LED bezel design of the monitor adds a sleek and stylish look to any gaming setup. The LED lights provide a cool and futuristic look, while also providing added visibility in dimly lit environments.

In terms of mounting options, this PCAP touch monitor can be easily mounted either using a VESA mount or panel mount, offering versatility and flexibility in installation. Additionally, the monitor is designed with durability in mind, featuring a scratch-resistant surface that can withstand the wear and tear of frequent use.

Overall, this gaming PCAP touch screen monitor is an excellent choice for gamers who demand the best in terms of performance, design, and durability. Whether you're playing the latest AAA games or engaging in other interactive applications, this monitor is sure to deliver a top-notch experience.

Features:

Product Name: Gaming PCAP Touch Screen Side+Edge LED Bezel

Touch Technology: Projected Capacitive

Design: Side+Edge LED Bezel

Brightness: Adjustable

Mounting Options: VESA Mount Or Panel Mount

Durability: Scratch-resistant

This PCAP TOUCH MONITOR is perfect for gaming enthusiasts who want a high-quality display. The Gaming LED Monitors feature a Projected Capacitive touch technology that allows for precise and accurate touch input. The Side+Edge LED Bezel design adds a sleek and modern touch to any gaming setup. The brightness is adjustable to ensure optimal viewing in any lighting condition. It can be mounted using VESA Mount Or Panel Mount options. Additionally, the monitor is durable and scratch-resistant, making it a reliable choice for long gaming sessions.

Technical Parameters:

Brightness	Adjustable
Type	Capacitive Touch Screen
Operating Temperature	0°C To 50°C
Response Time	5ms
Touch Technology	Projected Capacitive
Durability	Scratch-resistant
Certifications	CE, FCC, RoHS
Mounting Options	VESA Mount Or Panel Mount
Size	21.5"
Design	Side+Edge LED Bezel

This PCAP TOUCH MONITOR is equipped with Custom Capacitive Touch Screen technology.

Applications:

The Gaming PCAP Touch Screen Side+Edge LED Bezel is CE certified, which guarantees that the product meets the safety, health, and environmental protection standards that are required for sale in the European Economic Area. Additionally, this capacitive touch screen display is FCC and RoHS certified, which means that it meets the regulatory requirements for sale in the United States and the European Union.

This Anwell product is suitable for a wide range of applications, including gaming, retail, hospitality, healthcare, and industrial automation. The capacitive touch monitor can be mounted using a VESA mount or panel mount, which makes it easy to install in any environment.

The Gaming PCAP Touch Screen Side+Edge LED Bezel has a minimum order quantity of 2, which makes it suitable for both individual and bulk orders. The product application occasions and scenarios include:

Gaming and entertainment: The touch screen display provides an immersive gaming experience with its high resolution and responsive touch technology.

Retail and hospitality: The capacitive touch screen display can be used for interactive product displays, digital signage, and self-service

kiosks.

Healthcare: The touch screen monitor can be used for electronic medical records, patient check-ins, and information displays.

Industrial automation: The capacitive touch screen display is ideal for control panels, HMI systems, and process monitoring.

In conclusion, Anwell Gaming PCAP Touch Screen Side+Edge LED Bezel is a versatile and reliable product that is suitable for a wide range of applications. The capacitive touch screen display is highly responsive, accurate, and easy to install, making it an excellent choice for any business or organization that requires a high-quality touch screen monitor.
